

**P**OWERTECH  
ENGINEERING

## About Us

**Powertech Engineering was first company in India to identify the change in business landscape and invested in development of Telecom Infrastructure Management System (TIMS) platform. This is the first product which integrates remote monitoring, energy management and asset management. The product offering includes state of the art and secure, GPRS enabled, embedded remote alarm and energy logging client, with powerful and scalable central server software which provides data collection, analytics, Business Intelligence and NOC management software and service**

## **Corporate Profile**

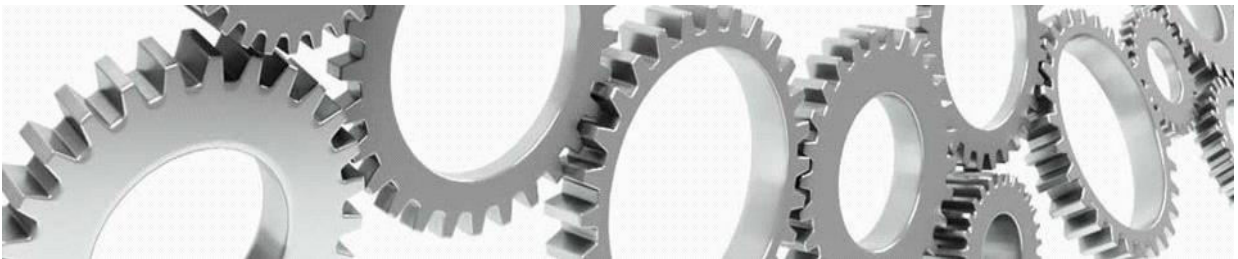

**PowerTech Engineering is one of the leading Telecom solutions providing company, having strong market standing, and team of strong resource. We provide integrated technology platform with a complete combination of Embedded and software solution. We provide total solution (End to End Solutions), reduce the manpower resource and get better ROI. Our products & services have marked excellence in the segments of Telecom Utility, Remote monitoring, generator monitoring, Embedded and Software Solutions.**

**By accepting all the key challenges we have introduced Monitoring and Management Devices and have all the expertise and resources to create National and Regional NOC for Telecom and other Remote Asset Monitoring businesses. Being in Remote Monitoring Systems and in Creating Virtual NOC for Telecom Infrastructure and Service Providers, the Innovative Engineering Solutions has now known as End to End Solutions which are comprehensive solutions having specific methodologies which provide best Asset Monitoring & Management of Remote key devices anytime anywhere in the world. The remotely monitoring helps in getting better ROI within no time.**

**Generator Monitoring System, Vehicle Tracking System, Telecom Infrastructure Management System, Business Centralization are Our Remote Asset Management related fields. Our Solutions are Customizable solutions that can be modified according to customers need. Our equipment's help**

to get real time data of the remote key assets. Powertech believes in finishing deadlines within time limits with best quality.

Customer satisfaction testifies Reliability and Unmatched quality of Unique Range of Powertech Products. We believe in Empowering Innovation by providing latest technology trends. Through our innovative techniques we will venture into more technology areas of asset monitoring and management.

## **Our Infrastructure**

We are the team of highly experienced Techno-commercials believe to encourage innovation and experimentation with continuous focus on to improve our product according to customers need. We have a cutting edge embedded designing environment which includes hardware design, software development and product quality control facility. Powertech believe to leverage its core competencies, ensuring comprehensive and state-of-art business solutions to its customers.

# Quality Policy

**Powertech Engineering**  
Stands Committed to design manufacture and deliver electronics automation products & Monitoring Systems to meet the requirements of Customers to their satisfaction. We shall pursue excellence in product quality and Services through innovation and continual improvement of quality.

# Client Satisfaction

Presence a customer-motivated firm, we work hard to maximize the accomplishment level of our regulars in the best conceivable way. For this objective, we check that only optimum quality selection of products is provided to our valued clients at highly economical price. Material used in their making process is acquired from trustworthy sellers of the market so that these are in tune with universally accepted quality principles. Our offered products are developed under the strict observation of our highly qualified professionals to deliver a flawless range of products for our valued regulars.

## **Our Vision**

**To become a company with global presence, providing best-of-breed products & customer focused solutions. Influencing technology and deliver to clients by best in-class people.**

## **Our Mission**

**Achieve our targets in an environment of Honesty, Fairness and Courteousness towards our Clients, Human Resources, Vendors, Channel Partners and Society at large**

## Why Us

**Our company has attained an extremely reputed place in the market for providing supreme quality products for our respected patrons, with chief objective of dispatching incomparable-quality products that satisfy with their rising needs and demands. The products we offer to our treasured patrons are quality-assured which are made-up by first-rate quality material at our vendors end. Along with this, we present these products at very economical rates. The detailed industry strategies and patron's gratification tactics aided us to stay top-most place in this competitive industry.**

**Some of our main traits are as follows:**

- Timely delivery
- Focused approach
- Efficient logistic facility
- Transparent dealings
- Optimum quality product
- Cost-effective price

## Our Product Range

### Remote Monitoring System

- GMS (Generator Monitoring System)
- RMS (Remote Monitoring System)
- BMS (Battery Monitoring System)
- SRMS (Server Room Monitoring System)
- Energy monitoring System
- FMS (Fuel Monitoring System)
- SPMS(Solar Pump Monitoring system)

### Alarm Panel

- Alarm sms Unit
- Smart alarm system
- Remote alarm systems
- Fire alarm systems

### Automation Panels

- **AIUS (Automated Integrated Utility System)**
- **AMF Panel**
- **Auto Phase Selector**

## **Other Products**

- **Spiu (Smart power interface unit)**
- **Dc Fan Controller**
- **Vehicle Tracking System**
- **Invertor For 48 VDC**
- **Softw Start Inventor For 48 VDC**
- **Cable Fault Detector**
- **Main S/dg Monitor (EBDG)**
- **Fuel Sensor**
- **AC-DC Adaptor**

## **Meters**

- **Digital Temperature and Voltage controller (DTVC)**
- **Low Voltage DC (LVDC) Meter**
- **Auto Mains Fail (AMF) Meter**
- **Energy Meter**
- **Volt Meter**

## Our Valuable Clients

दैनिक जागरण
